Barrie Overhead Crane Ticket

Barrie Overhead Crane Ticket - The overhead crane is a common heavy machine utilized in industrial environments. This particular equipment is known as a bridge crane and consists of parallel runways spanned by a traveling bridge. The part that lifts materials is the hoist. The hoist travels along the bridge.

Overhead cranes differ from construction or mobile cranes in which overhead types are used for manufacturing or maintenance applications where efficiency is vital. The steel industry normally requires overhead cranes. Steel is handled by an overhead crane at each and every stage of the manufacturing process, from the pouring of the raw materials into the furnace until the finished coils are lifted onto trucks and trains.

The overhead crane could also be found in the auto business and paper industry. The bridge cranes can help remove the heavy press rolls and other machinery at paper mills. Bridge cranes are utilized in order to install the heavy cast iron paper drying drums and other massive machines used in paper mills.
