JLG Telehandler

JLG Telehandler Training Barrie - Following retirement in the late 1960's, John L. Grove embarked on on a cross country RV trip. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

While on their trip, John spent time conversing with past business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered a considerable marketplace for a product that could promptly and securely elevate people in the air to accomplish upkeep and other building services.

Upon returning from their travels, John formed a partnership with two friends and purchased a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they designed and sold the first JLG aerial work platform. The business incorporates some of the simple design essentials of that original lift into existing versions.

JLG forklifts have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the company proudly continues to expand itself into numerous marketplaces worldwide and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer atmosphere.
